

Hospital Care@Home

Home, where health begins

With **Hospital Care@Home**, there's no longer any need to go to hospital to access many types of quality healthcare.

All **Hospital Care@Home** services operate under the care of your own dedicated Remedy Care Coordinator. He or she will guide and support you through your individual program, which may include:

- ✓ Nursing, to help with your individual requirements (e.g. wound care, IV antibiotics, medication management)
- ✓ Physiotherapy, to improve your, strength, balance, mobility and safety at home
- ✓ Personal care, to help with showering and dressing
- ✓ Home care, to help you with cleaning while you focus on your recovery
- ✓ Meals, delivered to your home to assist in the early days after leaving hospital
- ✓ Occupational therapy, to help you achieve independence and safety in activities of daily living, including dressing and showering.

Hospital Care@Home

Your dedicated Remedy Care Coordinator will coordinate these services to help you successfully recover at home.

Our Australia-wide team of experienced healthcare professionals includes nurses, physiotherapists and occupational therapists who provide an equally high level of service in your home.

Some Remedy Healthcare services also include personal care, home care and meals, which can make all the difference when recovering at home.
